

Insole Boards for the shoe industry

Inno Textiles manufactures various qualities of insole board, varying in thickness from 1.0mm up to 4.0mm, depending on the customer's requirements. All our insole boards are thermo mouldable and manufactured using needled non-woven polyester as a base, giving them a high strength and almost total immunity to water. We also supply these materials in various colours depending upon the customer's requirements. All our insole boards are supplied in sheets 1.0m by 1.5m in size.
